

Job Description

We are looking for a **Web Developer** to join our team at DeltaFrontier **in Malaysia**. An innovative Singapore-based company, DeltaFrontier is a fast-growing value-added solution partner providing cutting-edge technologies in the AI and IoT industry. As a regional distributor, we strive to be a leading new technology solution and product supplier.

Why DeltaFrontier?

DeltaFrontier's success is attributed largely to the highly skilled staff we employ and the professional service we provide, allowing us to expand speedily in this region. Our team is the driving force of the company, forging ahead to accomplish its mission and vision. Consisting primarily of proactive, accountable and creative talents with hands-on experience, you can learn from our MNC-background team to support various pre-and post-sales projects.

- You want the primary responsibility of supporting sales growth initiatives across South East Asia.
- You are passionate about new technologies and high growth in the upcoming years.
- You love working in a startup environment and can take responsibility in critical projects.

Responsibilities

- Develop new user-facing features.
- Build reusable code and libraries for future use.
- Ensure the technical feasibility of UI/UX designs.
- Optimize application for maximum speed and scalability.
- Assure that all user input is validated before submitting it to back-end.
- Collaborate with other team members and stakeholders.

Requirements

- Bachelor's degree in Computer Science, Computer Engineering, Networking Engineering or Information Systems.
- 3+ years Web development experience required.
- 2+ years App development experience preferred.
- Excellent knowledge of browser troubleshooting and debugging practices and techniques.
- Knowledge of graphics software such as Adobe Suite, Photoshop etc.
- Sense of ownership and pride in your performance and its impact on the company's success.
- Critical thinking and problem-solving skills.
- Team player.
- Good time-management skills.
- Great interpersonal communication skills.

How to gain a competitive edge

- Profound knowledge of web markup, including HTML5, and CSS3.
- Basic understanding of server-side CSS pre-processing platforms, such as LESS and SASS.
- Proficient understanding of client-side scripting and JavaScript frameworks.
- Proficient knowledge of JavaScript (mostly front-end).
- Good understanding of advanced JavaScript libraries and frameworks.
- Good understanding of asynchronous request handling, partial page updates, and AJAX.
- SASS or LESS development experience.
- MV* FRAMEWORK experience (e.g Angular, React.vue).
- Basic knowledge of image authoring tools. Familiarity with tools such as Photoshop is a plus
- Experience with graphic design applications such as Adobe Illustrator.
 - A UI/UX designer is expected to deliver finished resources for the developer to incorporate into the app. However, quite often a front-end web developer needs to make some small adjustments.
- Proficient understanding of cross-browser compatibility issues and ways to work around them.
- Proficient understanding of code versioning tools, such as Git.
- Core software development experience is a plus (Node, Python, PHP, Java).

What we offer

- A great team and culture with an MNC-background management team.
- Competitive salary and benefits.
- High growth opportunity for career development.
- Colleague recognition awards.
- Regional business travel expansion.
